

Together we can create a safe environment.

EVERYONE IS CONTRIBUTING TO THE SAFETY IN THE GYM

We reopened our locations for group training on May 18th and went on to increase class sizes to maximum of 18 participants on June 8th. So far there have been zero reports of any Covid-19 infections in our customer ranks. It is up to everyone to contribute to keeping it this way.

Our staff contributes to safety at Balboa through...

- ...consistently implementing measures of hygiene.
- ...planning and organizing courses in compliance with all aspects of safety.
- ...airing spaces after workouts.
- ...removing sweat after workouts from surfaces.

B

Our visitors contribute to safety at Balboa through...

- ...adhering to the maximum capacity of our changing room facilities.
- ...avoiding the touching of faces with hands.
- ...positioning themselves during a workout so as not to breath on others.
- ...sticking closely with their group during get-ins and get-outs so nobody gets left behind and groups don't mix.
- ...disinfecting hands and any used materials.

B

CAPACITY LIMITS IN OUR CHANGING ROOM FACILITIES

Next week we will **stop** splitting the registering for workouts into Group A (use of lockers/showers) and Group B (no use of lockers/showers). We are confident that our clients diligently respect the capacity limits in the changing room facilities. For further guidance please check out some of our [recent Instagram stories](#).
